Projects

Accounting

This is a cloud-based accounting system built with Node.js and Express, using a MongoDB database. It tracks income and expenses from business bank accounts and can approve and print bills and payment vouchers.

HR System

This is a cloud-based HR system built with MERN. It includes features such as employee document management with expiry tracking, attendance management, and task management. The system also has a mobile app for employees to clock in and out for attendance and to view and update their assigned tasks.
