Current Projects

Biyaya POS – Point of Sale System
A modern Point-of-Sale web application built with the **MERN stack**, **Redux**, **Vite**, and **Tailwind CSS**. It enables coffee shop owners to manage profiles, menus, employees, and images, while providing customers with a responsive public-facing interface. The system is deployed on **Vercel**, **Render**, and **MongoDB Atlas**, following an **MVC architecture** for scalability and maintainability.

AKG - Accounting System

This is a cloud-based accounting system built with Node.js and Express, using a MongoDB database. It tracks income and expenses from business bank accounts and can approve and print bills and payment vouchers.
